VITAMINWATERS

*Aqvital mineral waters offer a new,
wide product range for
the health-savvy consumers.*

The water you need.

Drink responsibly

We believe in responsible drinking. With our range of healthy drinks we help you hydrate your body, maintain an optimal level of alkalinity and supply the essential vitamins on a daily basis.

Our mineral water Aqvital, the ionized alkaline water Aqvion and our functional waters like Aqvitamin and Aqvirade perfectly support these goals.

I. HYDRATION

II. ALKALINITY

III. VITAMIN SUPPLY

Na⁺
6.3 mg/l

Ca²⁺:Mg²⁺
2:1

pH 9,3

C

I. Hydration: Quality hydration is made possible by the mineral content of Aqvital natural mineral water.

II. Alkalinity: Thanks to the micro-clusters of ionized water, Aqvion becomes a smooth-tasting 9.3 pH alkaline water that can be absorbed quickly and easily detoxing and hydrating the body more effectively.

III. Vitamin supply: By drinking water enriched with vitamins we can gain our daily vitamin dose in a natural way. Vitamin-waters don't contain added sugar, they are flavoured with stevia.

Drink responsibly, drink Aqvital!

Natural mineral water; still; bottled without any other treatment.

Bottle: 0.5 l and 1.5 l

total dissolved mineral content

730 mg/l

Quality mineral hydration

PRODUCT EAN 1.5 l	5999887277009	SHRINK EAN 1.5 l	15999887277006

Ionized, alkaline pH 9,3 drinking water produced by electrolysis.

Bottle: 0.5 l and 1.5 l

The increased pH 9,3 may fasten the detoxification of the body.

The ionized alkaline water may stimulate metabolism, and may be diuretic.

The alkaline water may help in demolishing deposited adipose tissues.

Due to the concentrated calcium and magnesium digestion, degrading acid food may be easier.

Due to ionization the smaller water molecule clusters may better fill cells, hence hydration and detoxification may be more effective.

Excellent product from Hungary

The well and plant of Aq vital is located at the feet of Vértes Hills, in a calm countryside of Csákvár, Hungary (member of the European Union). All the layers of the dolomit hill are ancient marine deposits, with white cliffs and canyons. Csákvár is at the feet of this 1260 km valley network, which serves as a perfect cistern. Spring and river are very rare in the mountain, instead the rainwater filters into the deep through the dolomits. We gain our mineral water from this well-sealed natural environment that is filtered and cleaned by the Vértes karst's ancient fossils.

Not only the quality of our products reflects consciousness but also **the production process**: we use **environmentfriendly PET bottles**, apply **superior quality packaging**, and demand a **high standard of work safety**.
