## What can we know about the soy bean?

- **Oils and proteins** build up in **60%**, 40% are oils and 20% are proteins.
- In 100gr. soy the amount of protein is approximately **equal to the amount of protein to be found in beef meat** (37-41gr.).
- The soy bean is reach in **vitamins A, E and K** and certain **vitamins B as well as in potassium** that plays an important role in our bodies' fluid-balance process. Besides these, the soy bean has a very positive physiological effect due to its **iron, phosphor, calcium, and amino acid** content,. It blocks the accumulation of cholesterol in the kidney, in the brain and in the heart.

## What are the physiological effects of Patria Esencia Roasted Soy Bean?

- Our products contain all of the valuable components of the soy. One of these is soy oil which is extremely rich in unsaturated fatty acids of **Omega 3**.
- The **essential fatty acids** influence favorably the composition of organic fats of vital tissues, such as **heart, blood, brain, and nervous system**. They delay the deposit of cholesterol, and decrease the risk of the conformation of high blood pressure and diseases of circulatory system.
- The **lecithin** is an important brick of the nervous system, body cells and red blood cells.
- From the fat-soluble vitamins, **vitamin E** can be found in a high rate. It helps the synthesis of vitamin C in the human body.
- Because of its poor purine content, soy bean is the main meat substitute **protein source**.

## Whom are Patria Esencia Roasted Soy Bean Products recommended for?

- **For the little ones (above age 3)** – lots of vitamins help the growth, while calcium makes the bones stronger
- **For the grown-up ones** – supports the circulatory system, decrease the cholesterol level and the risk of certain cancer diseases
- **For the adolescent ones** – assists the optimal functioning of the brain cells and the nervous system
- **For the elder ones** – instead of excessive intake of carbohydrate; provides the body with huge amount of valuable nutrients
- **For the sporty ones** – low rate of calorie—high rate of protein
- **For the expecting ones** – stands in the stead for the baby's growth and development
- **For the gourmet ones** – delicious snack even if you are at the wheels

## How are Patria Esencia Roasted Soy Bean Products made?

- **From GMO free** soy beans, grown in Hungary, so we can use **domestic** soy for our products.
- During the conversion soy bean is processed only by physical methods, **without any chemical intervention**.
- During the process, indigestible parts of the raw soy beans are eliminated **without damaging any important biological feature**, keeping the highest level of their value.
- Finally, we get the roasted soy bean that is a **delicious and ready-to-eat** delicacy.
- To increase the level of experience we make the consumption more multifarious with different flavorings such as **salty or cheesy**, and coating with **high quality dark, milk and white chocolate**.
