HISTORY - VISION - MISSION

The Obstermann's LLC has grown from a family business. Our company started its activities in the fruit cultivation citadel, in the region of Szatmar. Our best quality fruit ingredients ensure that the flavors and composition of our products are of high quality.

We launched several product lines to meet the different needs of people of all ages. Each has two things in common: high-quality and natural ingredients.

We are committed to producing delicious delicacies of natural ingredients. That's why we decided on a small-scale production method.

Our business principles continue to evolve and adjust to the changing world. However, some things are permanent between the following priorities: quality, natural ingredients and follow-up on needs, developing and marketing more and more innovative products.

However, we envision the expansion of our market position on a small-scale framework. We do not want to lose our original ideas and craft technology. We are proud to maintain our original formula and our standard of quality. Till we get to the main goal, we will always strive to meet the needs of our customers to the maximum, with our natural ingredients products.

Continuous product development and modernization also introduced a food safety quality management system that has been adopted worldwide, IFS. By using it, we would like to express our commitment to serve our customers safe food products. It's another way for us to strengthen the confidence in our products.
