MAIN PRODUCTS, SERVICES AND SOLUTIONS

BELUX has developed the **Greek Medical** speech recognition system in 2014, based on more than 500.000 medical reports from various hospitals.

Globalspeech is an information capturing platform which enables healthcare IT system providers to deliver seamlessly integrated digital dictation and speech recognition capabilities to hospitals, clinics, transcription companies and group practices.

Our solution can be fully integrated in hospital information systems, besides, it also offers independent solution for smaller institutions.
