Aranycipó - Quality and Innovation in the Hungarian Bakery Industry

About us

Our company, Aranycipó Kft., is a Hungarian family business founded by the Büki family in 1991. With the goal of producing high-quality baked goods, our company has established itself as a reliable partner for supermarkets, retailers, and the catering industry. With decades of experience, we offer both traditional and innovative products that meet the diverse dietary needs of our customers. Our headquarters is located in Pécs, Hungary. Our 10,000 m² production facility enables us to operate flexibly and meet specific customer requirements.

Büki Family - The Founders and the second-gen owners of Aranycipó Kft.

Our assortment includes a wide variety of baked goods:

- **Traditional Products:** Fresh bread, baguettes, rolls, and pastries made using time-tested recipes. In Hungary, we are the only company licensed to produce and distribute König Ludwig Bavarian Rye Bread. Among our best products are also our Danish pastries, available in both sweet and savory varieties.
- **Specialty Products:** Gluten-free, lactose-free, low-carb products, and sugar-free options to meet specific dietary needs.
- **Custom Developments:** We collaborate with our partners to develop tailor-made products according to their requirements.
- **Bake-off Products:** Thanks to our shock-freezing technology (using liquid nitrogen and electric methods), we can produce a wide range of bake-off products.

Quality and certifications

Quality is our top priority. Our production processes adhere to the highest international standards, as confirmed by our **IFS certification**. Our dedicated team ensures that all products undergo rigorous quality controls to guarantee customer satisfaction. We select our suppliers from the best in the industry, prioritizing both quality and sustainability. As a result, we also hold an **RSPO certification**.

Sustainability and innovation

Sustainability is a core part of our company philosophy. We invest in energy-efficient technologies and use renewable energy to minimize our ecological footprint. Additionally, we continuously invest in innovative processes to further improve the quality of our products while being environmentally responsible.
