# Introduction

## Welcome to Pharmaforte Ltd.

Pharmaforte Ltd. (Hungary) is a family-owned enterprise established in 2002 in Budapest, Hungary by two internationally acclaimed scientists. They are both experts in bio-medical and drug research. Integrating their international experience and expertise from universities and pharmaceutical companies in California, New York, Belgium and Budapest, they focused on the development of dietary supplements. These functional food products can provide health protection as well as complementary therapies that contribute to the prevention of disease.

Pharmaforte was the first in the Hungarian market that launched a dietary supplement containing cranberry extract. (**CRAN-C** supports urinary tract health). Other newly developed products containing bilberry and pomegranate combined with vitamins followed that target eye and cardiovascular health problems (**Bilutin, Lutein, Galma**).

In 2005 the company developed a series of new products with plant extracts for respiratory health, against runny nose and vision degeneration, as well as antioxidant products (capsules and drops).

Since 2006, the scientists at Pharmaforte Ltd. established a cooperation with a small American company for developing and then establishing clinical studies of fertility enhancing products for men and women. The clinical studies have been carried out at Stanford University in California and at the Fetal Diagnostic Center in Hungary. **Ferulant** for men was registered in 2007 as a non-drug therapeutic in Hungary and as a supplement in the USA.

**Ovant**, fertility enhancing product for women was registered in 2011 as supplement.

Between 2012 and 2015 a few unique supplements were developed for reflux and weight loss, as well as Vitamin products (**D3 and K2**) and a multivitamin, **Maximus** for men. In cooperation with a Dutch company, Pharmaforte Ltd. placed a UTI product (medical device ) on the Hungarian market.

## Our values

The most outstanding values of Pharmaforte Ltd. are scientific integrity and trustworthiness – statements about products are rigorously proven science-based claims; quality of products – all raw materials and products are analyzed even if it is not obligatory by local regulations. Also, by watching for the newest scientific and clinical research, we are constantly adding new products to our scope and we are constantly renewing our products. We have developed 16 own products.

Our joint venture partner (Pharmafort, Inc established in the USA in 2004, with the same ownership) performs the analytical tests on all ingredients before their use in production. Final products are also analyzed, in some cases by independent accredited analytical laboratories.

As an ongoing effort, Pharmafort Inc. undertakes further clinical studies on Ferulant, Ovant and soon Ovant-Baby products.

**Our values:** the highest quality, gold standard ingredients, trustworthiness, customer satisfaction

## Mission

Our mission is to help and maintain the health of people by offering a wide range of supplements and herbal medicines. Our goal is to help couples waiting for a baby by offering fertility improving products, as well as to support the health of expectant mothers by state-of-the art prenatal multivitamins.

## Vision

Our vision is to be an outstanding, successful and trustful pharmaceutical company that provides the highest quality products and trustworthy health consultation by interpreting and evaluating the newest scientific results for customers. Pharmaforte Ltd. intends to be a preferred partner for pharmaceutical wholesalers in Hungary as well as abroad.
