Essential assistance in organising the sterile supply and disposal cycle

The complete product range covers a wide range of applications from stainless steel mobile assistants to storage, including disposal, packing and transportation

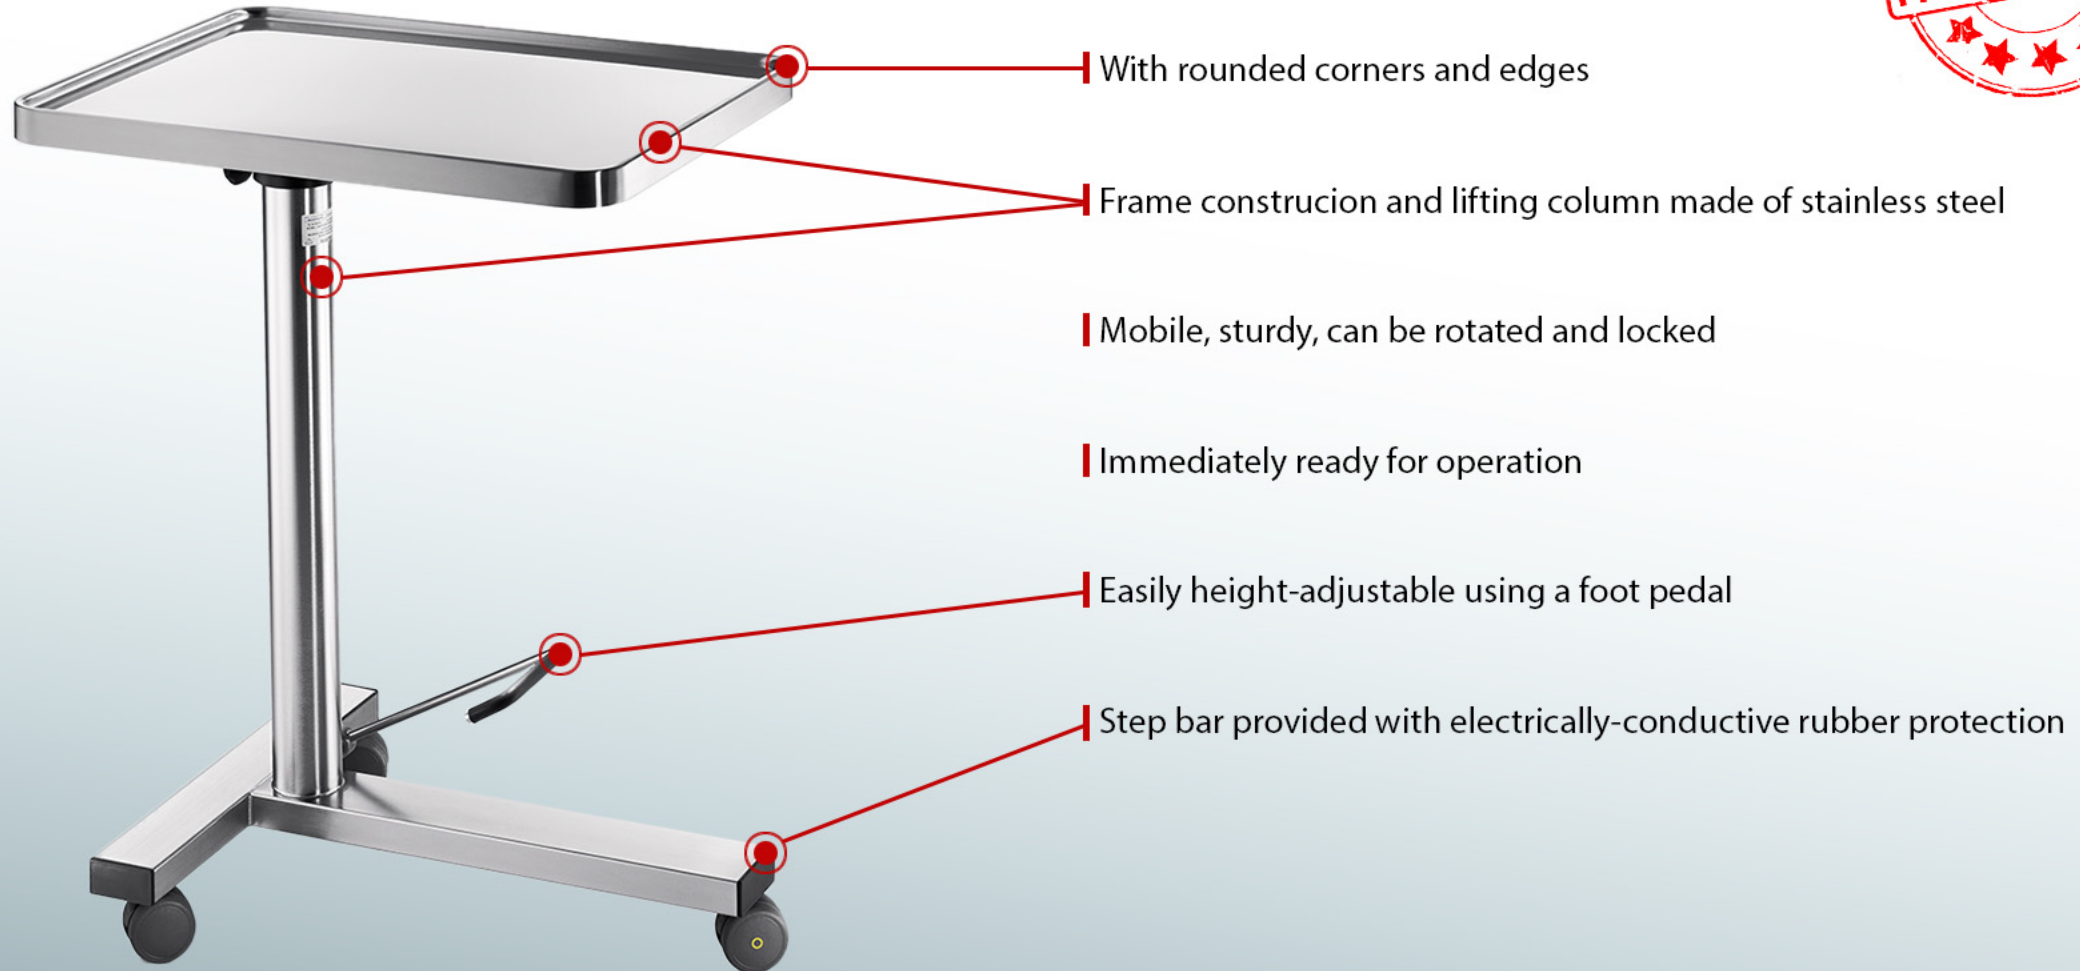

Ergonomic design of workstations, optimal storage and transportation of components, which are crucial in hospitals

# One of our featured products

Hydraulic pump mayo instrument table

**MED-Systeme**

# Reference I.

**MED-Systeme**

Klinik am Eichert, Göppingen, Germany - 2023/24

One of the largest construction projects in Baden-Württemberg with a total volume of **€ 465 million**

This hospital project creates space for state-of-the-art medicine and care, ensuring high-quality healthcare for **~250.000 people**

Construction began in April 2019. The opening of the new building is planned for 2024

The project also includes sub-projects such as a daycare center, a parking garage and staff apartments

We supplied and installed Megaprogress built-in cabinet system in the amount of **€ 750 000**

# Reference II.

The new Munich Clinic Harlaching, Germany - 2024

**MED-Systeme**

This clinic in the countryside offers the best possible medical care in the south of Munich

Modern medicine also needs modern structure. The new building will replace the existing ones and bring the centers together under one roof

The areas of trauma medicine, stroke care, births and pediatric medicine as well as geriatric medicine are being specifically expanded

Our participation is **€ 2.2 million**  
(MEGAprogress)
