

**REVOLUTIONIZE
WATER
MANAGEMENT
WITH NABI
METER**

WHO WE ARE

2012 company est.

 General Mechatronics

 **IoT Digitalisation**

IoT Solutions

 **Trusted Partner**

Cooperation with

Battery – Powered IP68 Waterproof Design

Low-Power NB-IoT Communication with Industry-Standard Encryption Options

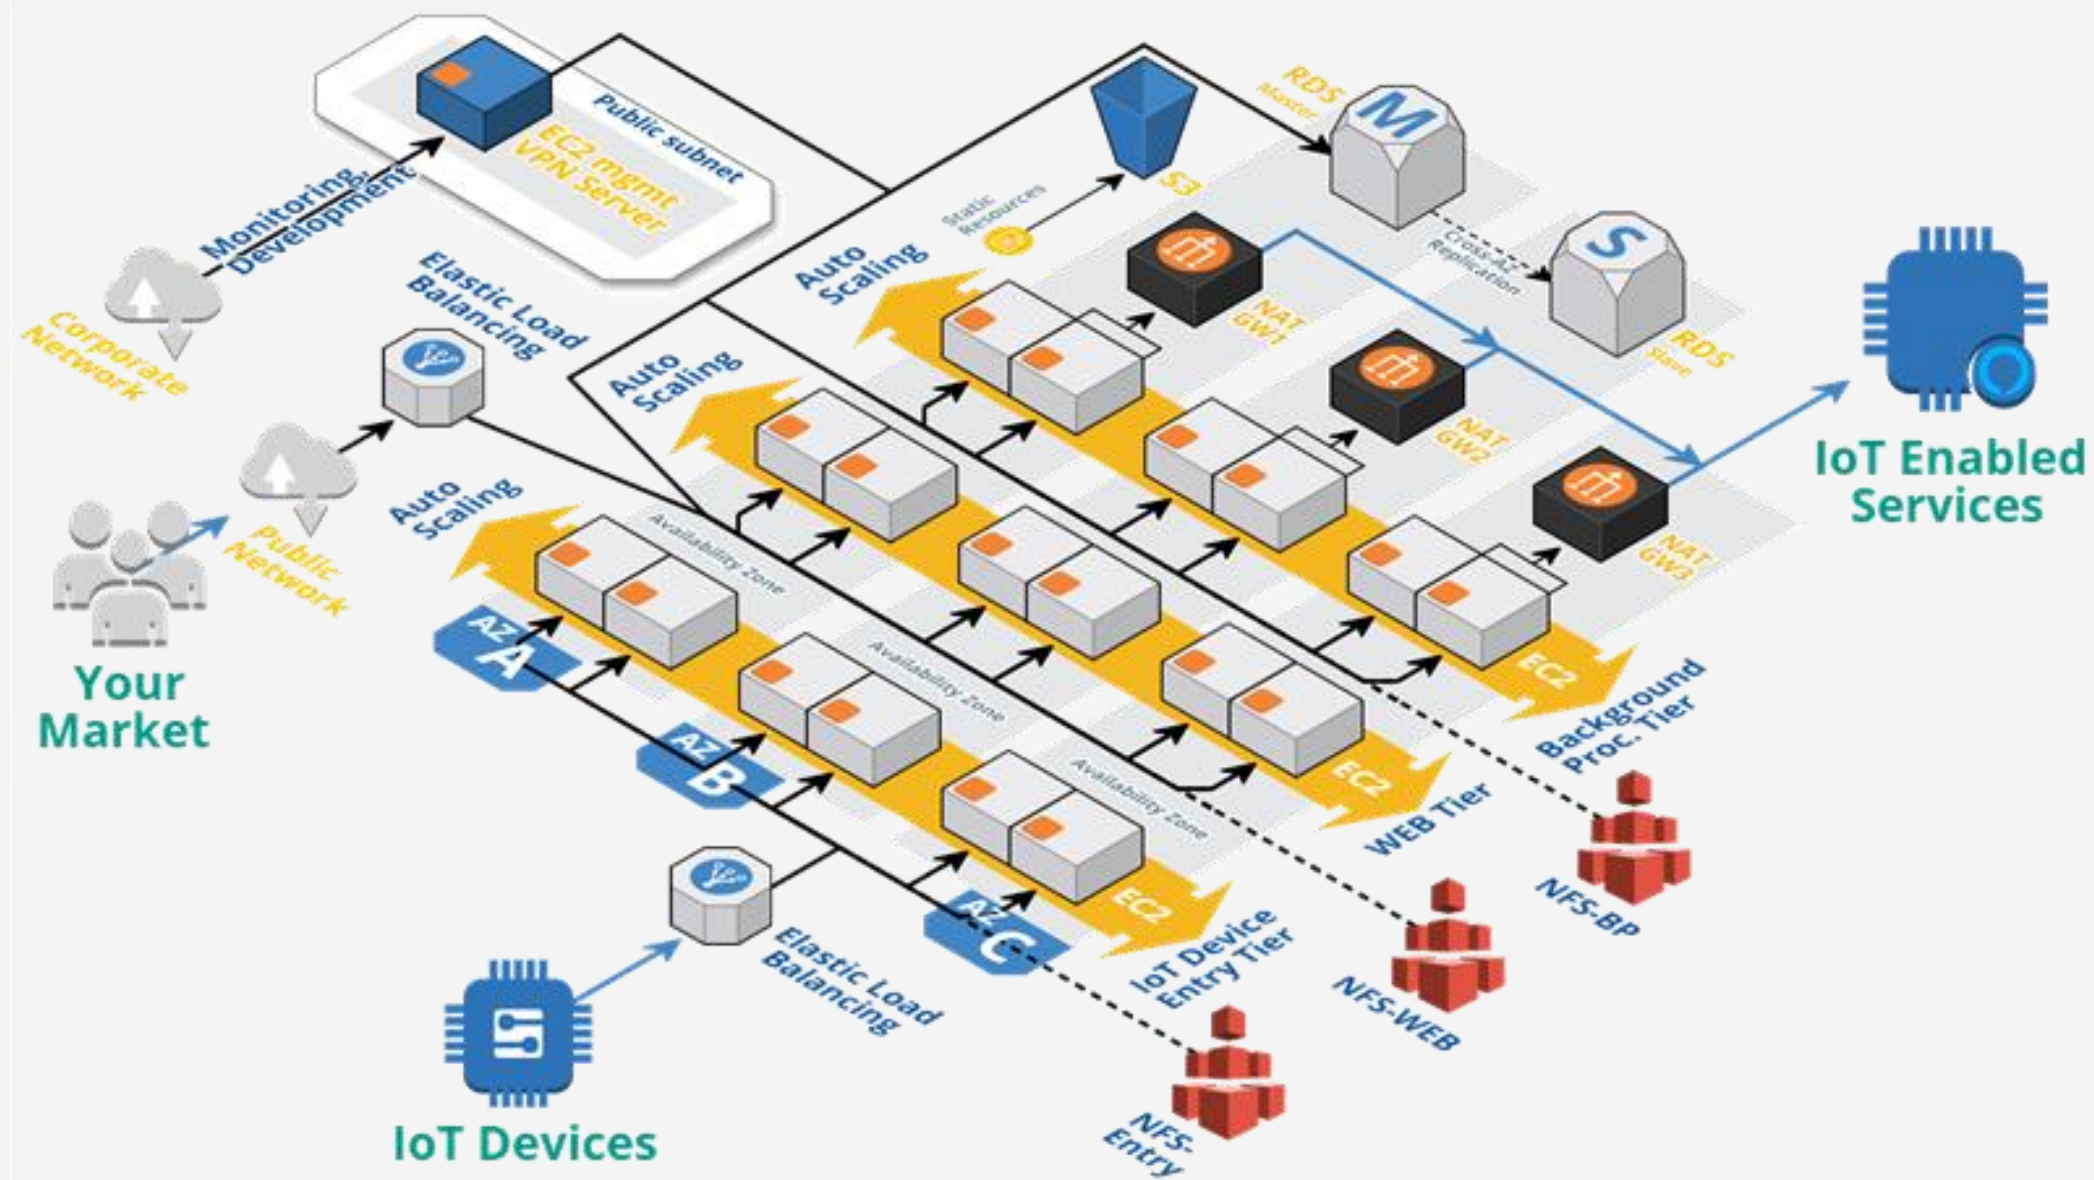

Support for Low-Cost, Industry-Standard WM-BUS & LoRa Smart Meters

Water Meter Supplier Independent

Cloud Server Solutions

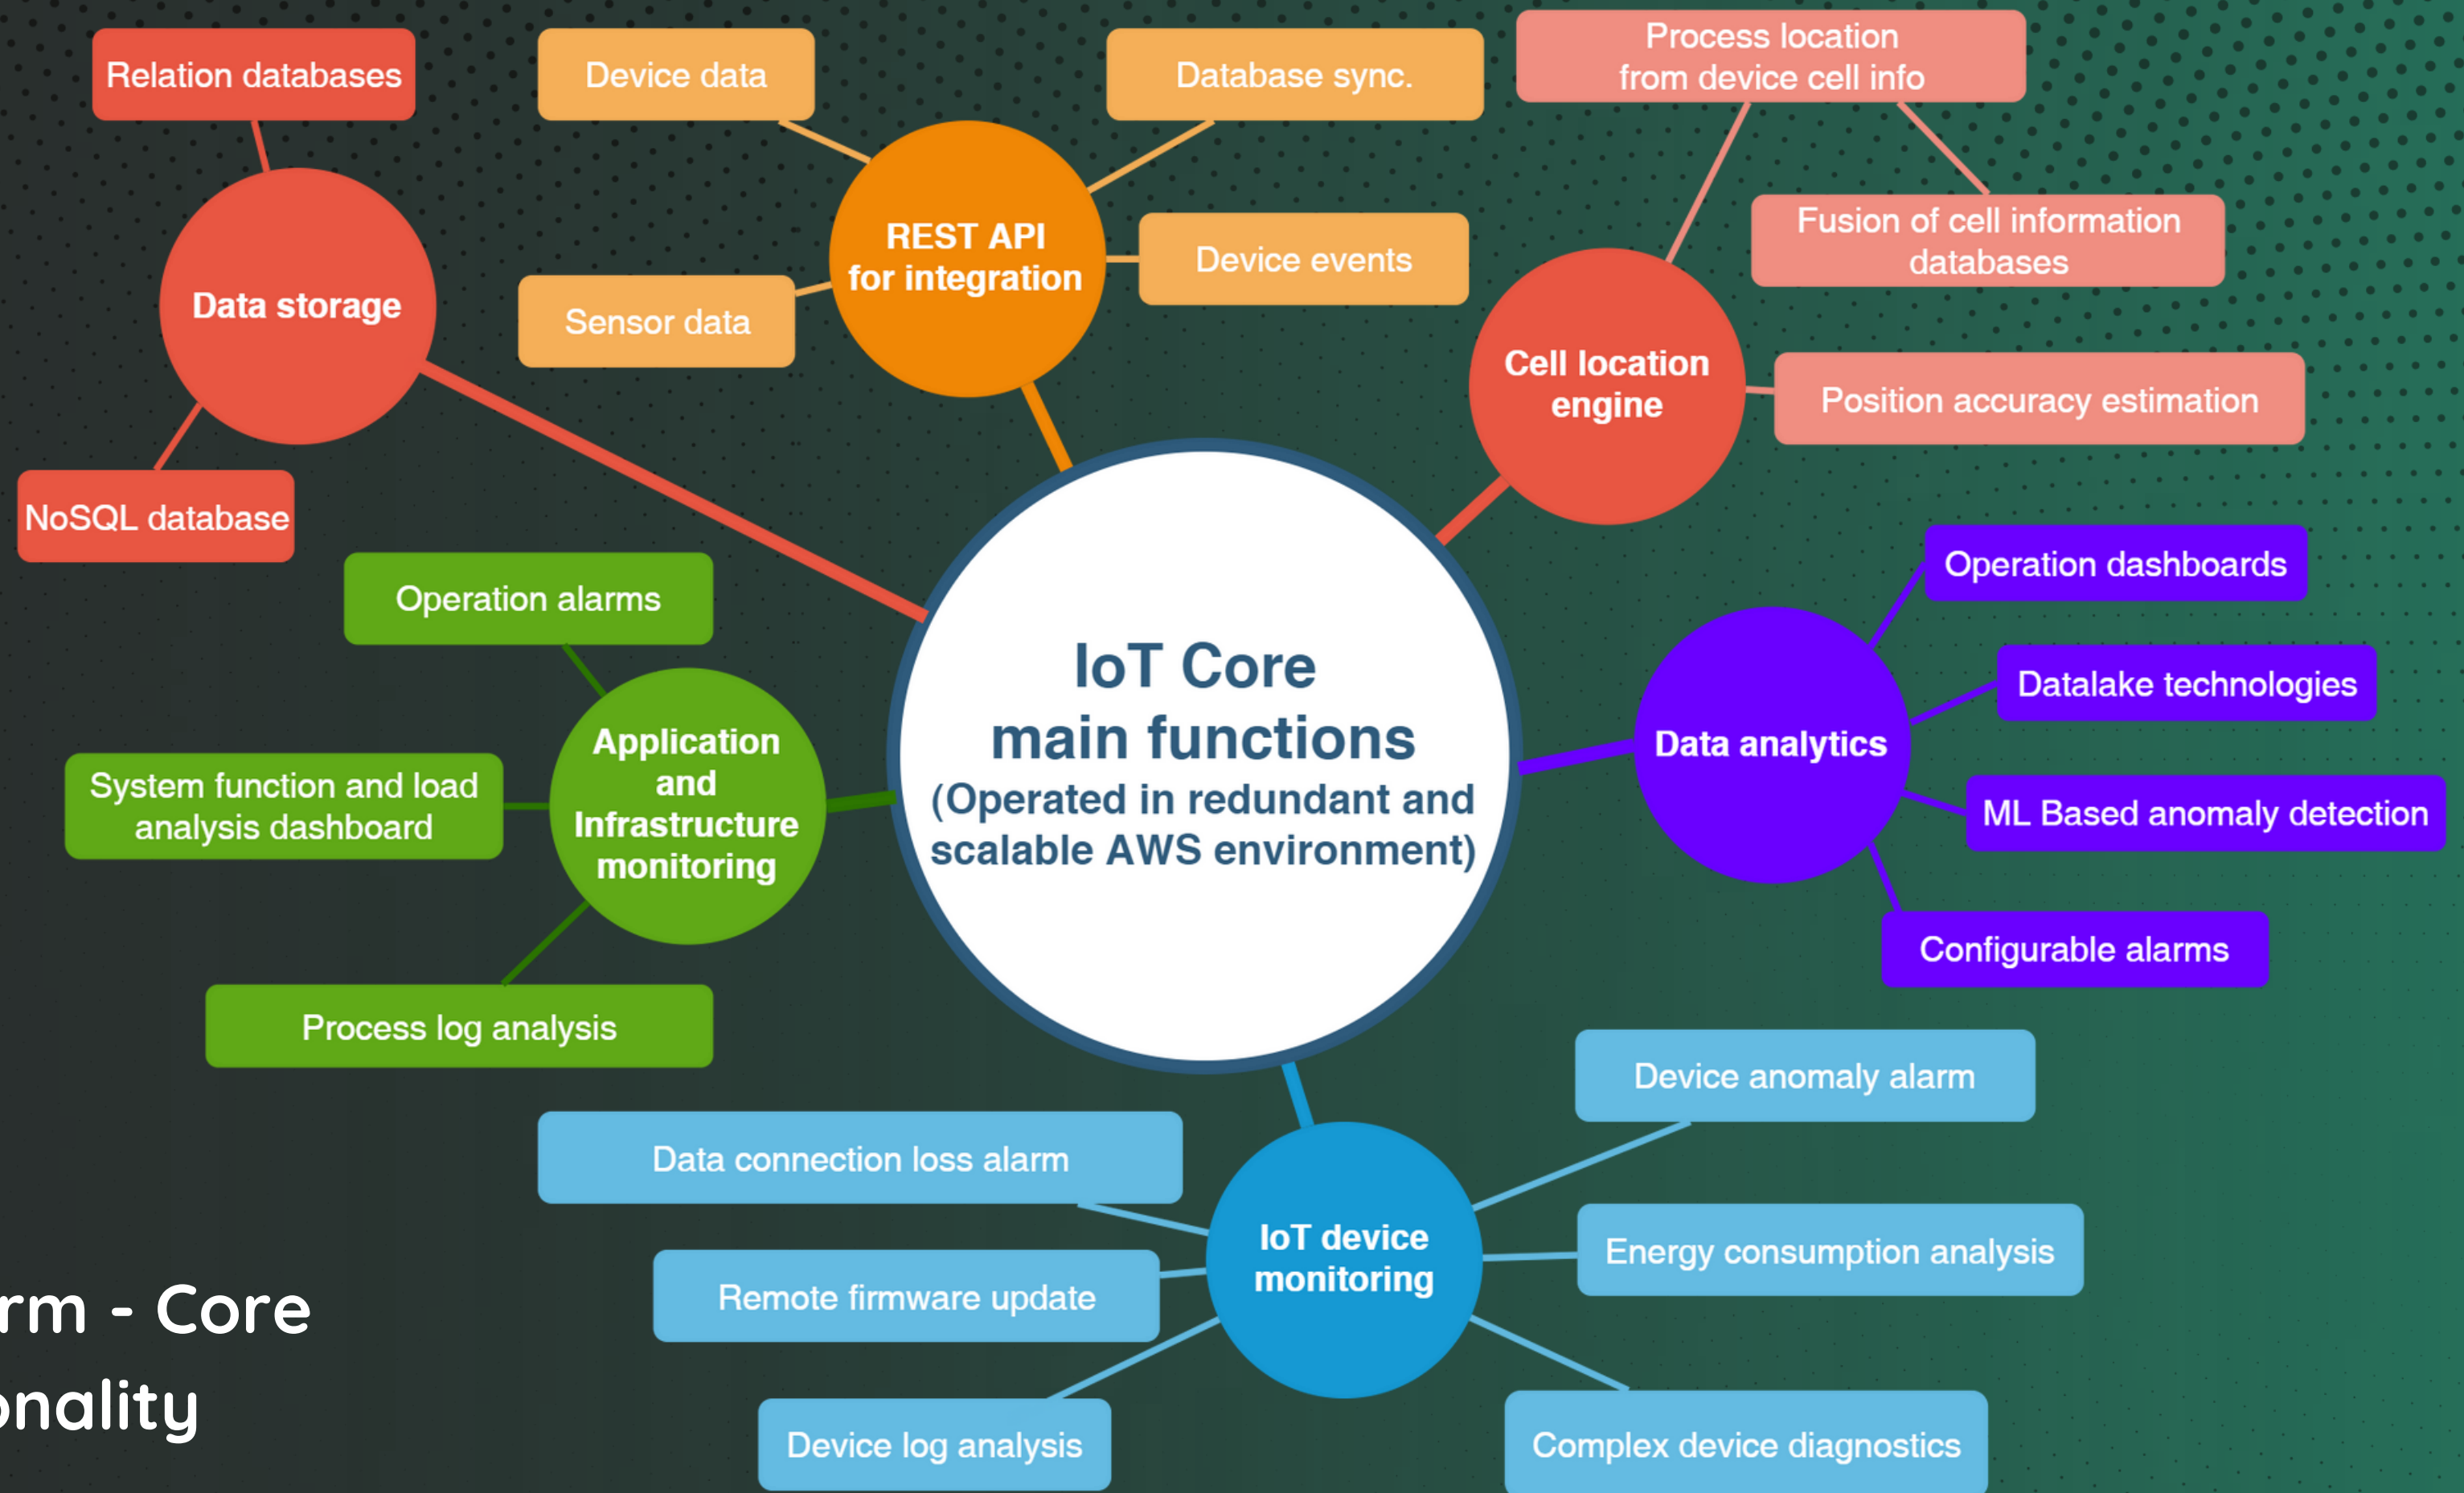

Highly available and secure platform

ISO Certified

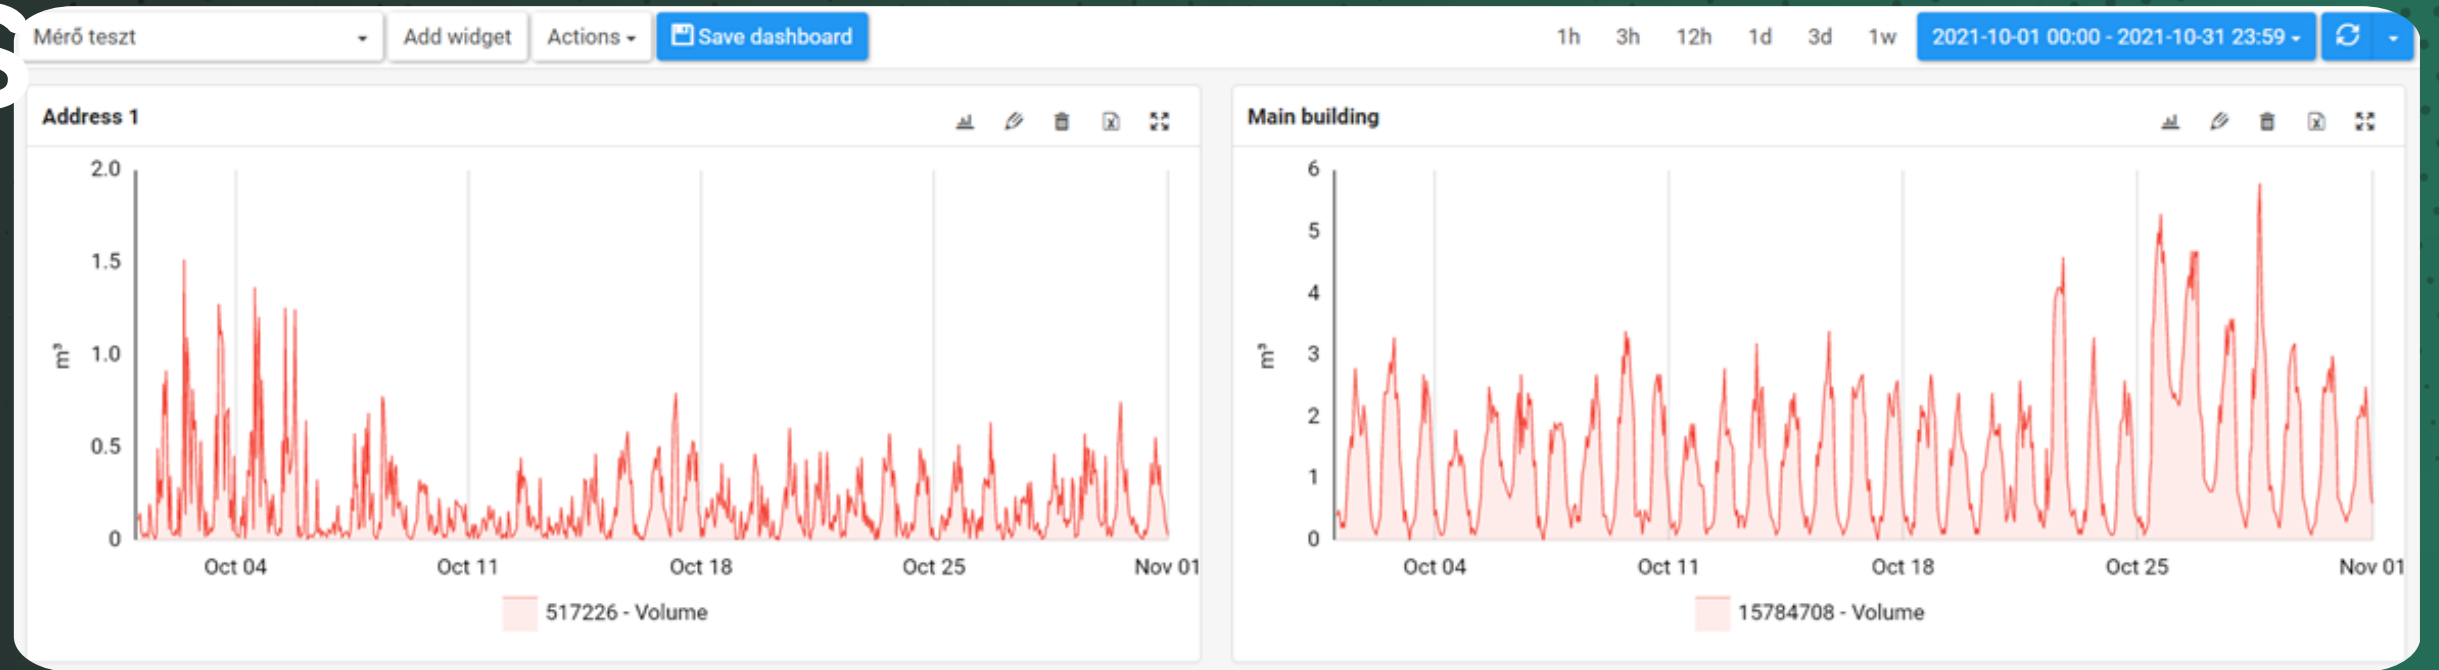

IoT Platform - Core functionality

Basic

01 analytics

High-resolution consumption data.

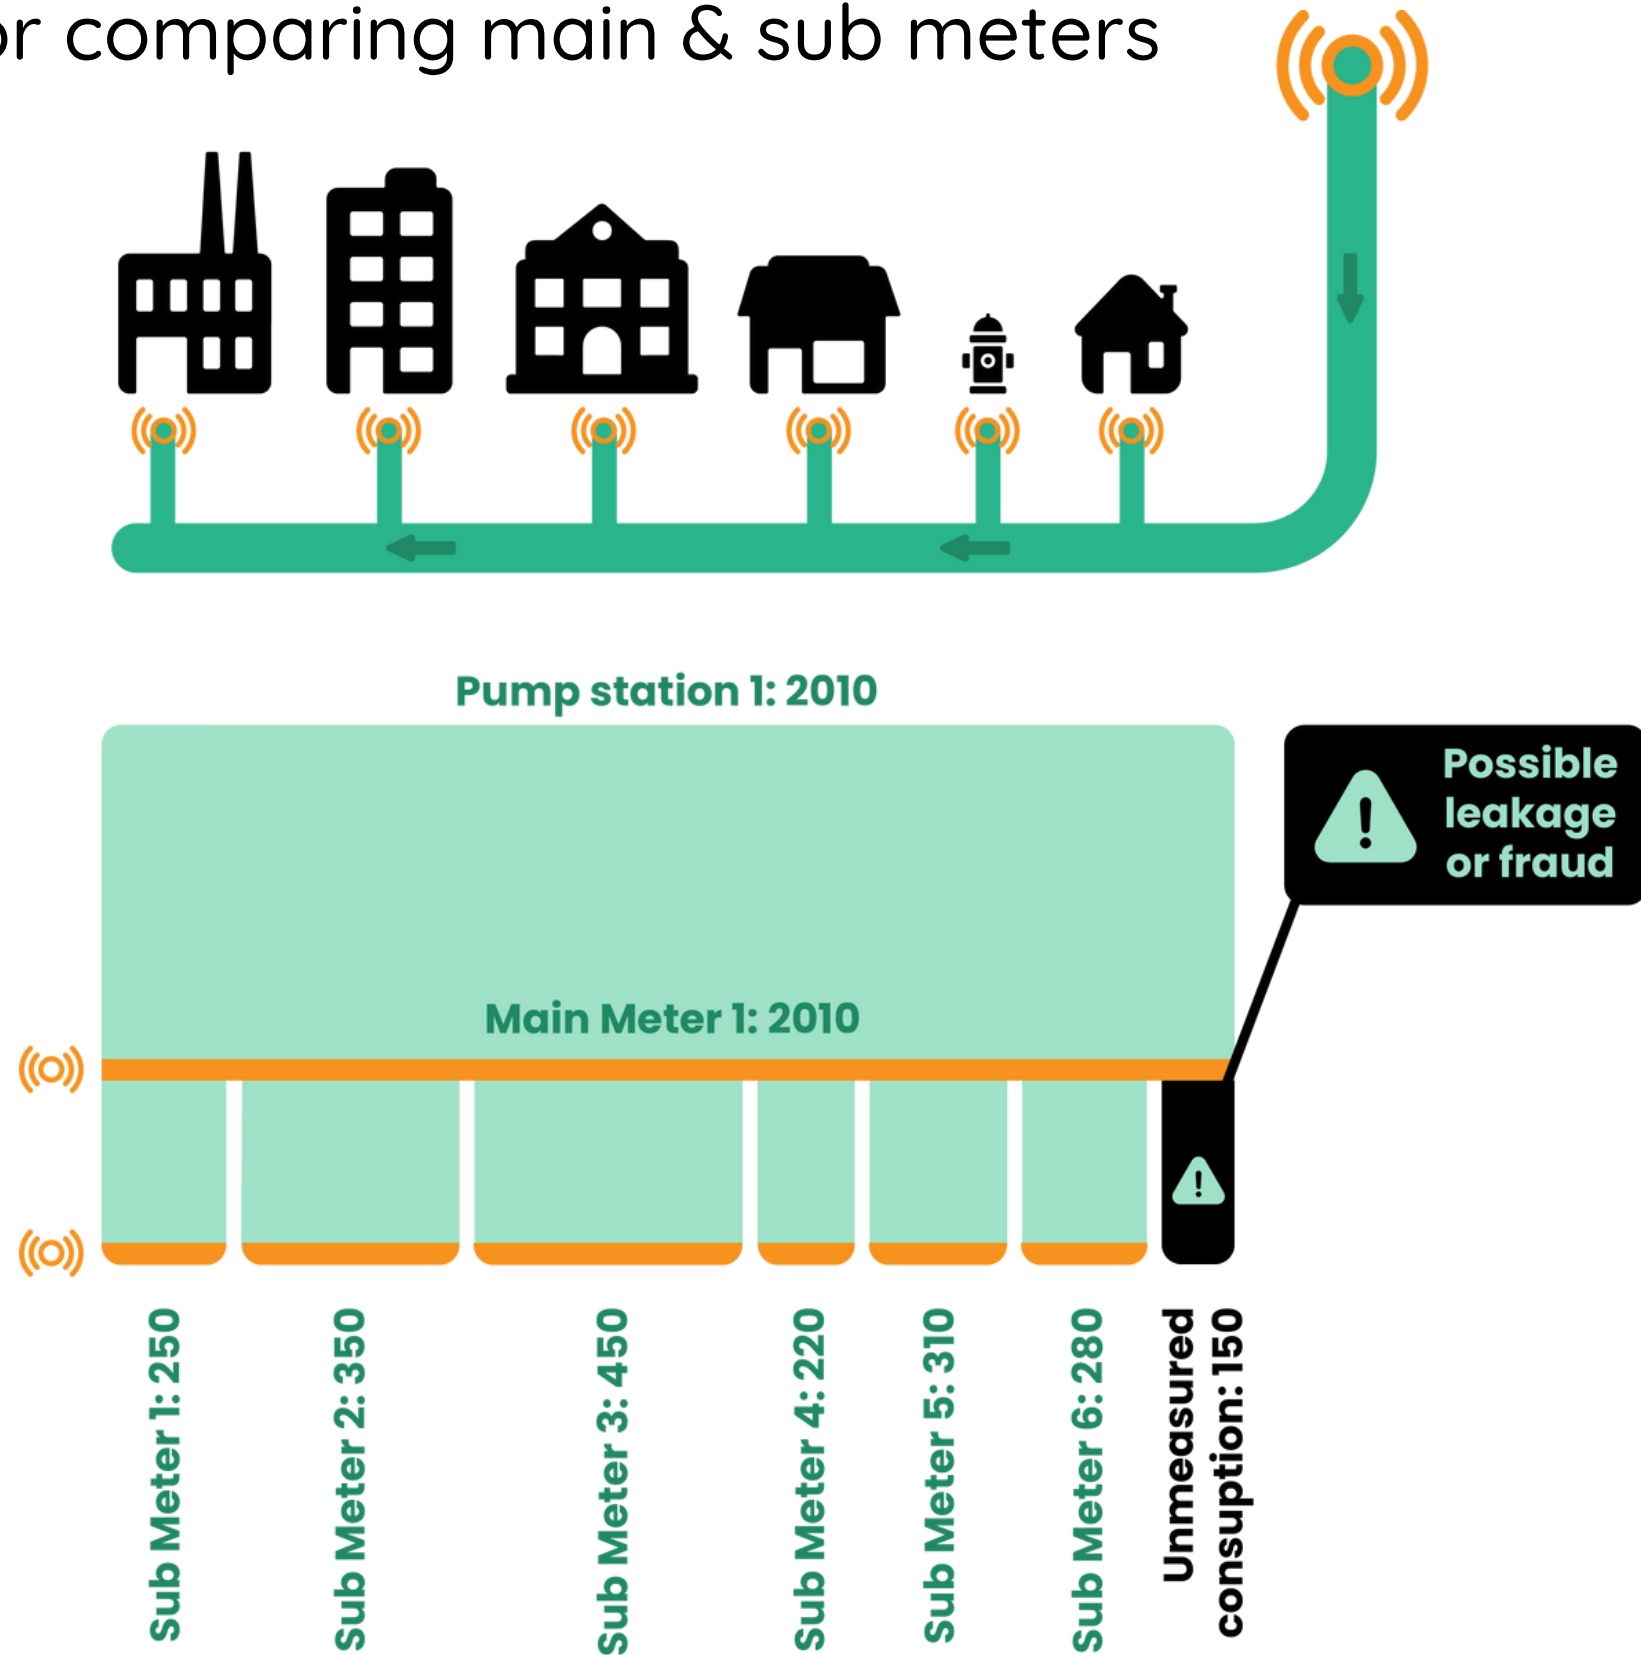

02

Event or consumption based listing

Device identifier	Install reference	Motion state	Temperature	Meters	Links	Battery status	Last communication	Tag

ADVANCED ANALYTICS: SANKEY DIAGRAMS AND AI-BASED ANOMALY DETECTION

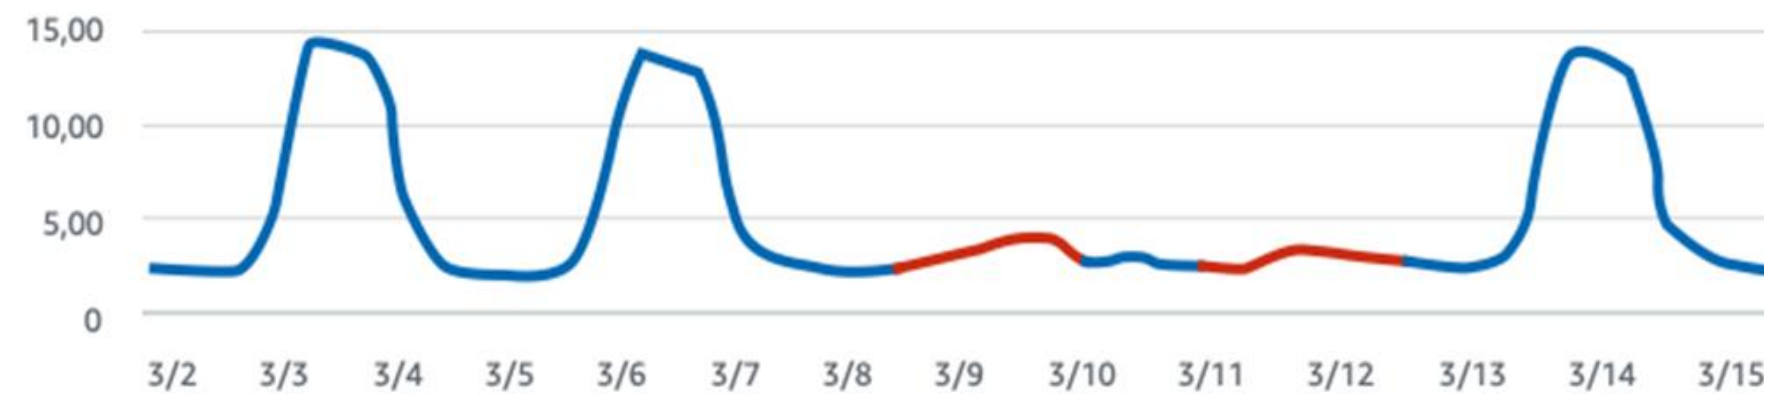

For comparing main & sub meters

AI-BASED ANOMALY DETECTION

Amazon AWS cloud Machine Learning (ML) services are used to automatically detect and diagnose anomalies in measurement data.

Customer use-case specific unique implementations available.
