OUR SERVICES

Complete solutions - from one source

Hidro-Consulting Kft. is present across every area of the water management and civil engineering sector: from planning and construction to trading and operational support. Thanks to our comprehensive approach, our clients need only one partner.

Planning

Complex design of water and wastewater systems, permitting

Construction

Project management, technical supervision, consulting

Trade

Civil engineering products, Grundfos pumps, tanks

Innovation

Climate protection, ecological solutions, special technologies

Deep Construction Design and Expert Services

What do we design?

- Comprehensive design of water and wastewater systems and networks
- Preparation of permit and construction documents
- Full management of the permitting process
- Expert support throughout every phase of design

Our Expertise

Drawing on decades of engineering experience, we provide comprehensive design services for water and wastewater networks—from preliminary studies through permitting documentation to as-built plans. Our team is actively involved in every regulatory procedure, so our clients do not have to navigate bureaucratic processes.

Civil engineering construction and consulting

Professional project management and expert supervision during the implementation of civil engineering facilities — both from technical and economic perspectives.

Technical and economic consulting

During the construction process, we provide continuous technical and economic consulting, helping ensure the efficient execution of investments and the optimization of costs.

Project management and supervision

Our experienced engineers provide full project management and professional supervision, ensuring quality completion and on-time delivery.

Land Surveying Services

Comprehensive engineering geodesy tasks

We carry out precision field surveys throughout the country. Our services cover property rights arrangements, engineering geodesy tasks, and all surveying work required for the preparation and implementation of deep construction projects.

Our range of services

- Engineering geodetic surveys
- Property rights arrangement
- Precision field surveys
- Nationwide coverage

RETAIL STORE & WAREHOUSE

Retail store and warehouse stock for civil engineering products

Pipes and fittings

A wide selection in various sizes and materials, with stock available for immediate pickup.

Manholes and channels

Distribution of complete manhole elements and channel systems with expert advice.

Tanks

Sales of tanks in various capacities for industrial and residential use.

Large-diameter pipes

Priority stock: large-diameter pipes available immediately, with on-site service.

Grundfos Pump Technology

Official Grundfos Partner

We provide official Grundfos sales and service support for both industrial and residential customers. We offer complete pump system solutions from design to maintenance.

- Pump system design
- Delivery and commissioning
- Regular maintenance
- Industrial and residential projects

Environmentally Conscious Water Management

Sustainable solutions for rainwater utilization - for the benefit of future generations.

Rainwater Harvesting Tanks

Distribution and professional installation of rainwater harvesting tanks. Sustainable solutions for efficient rainwater utilization.

Ecological Wastewater Treatment

Root-zone wastewater treatment and composting toilets to reduce the ecological footprint - with nature-based technology.

Household Wastewater Treatment Systems

Nationwide distribution and installation of small-scale systems - custom solutions for every property.

Climate Protection and Innovation

Specialized Technologies

Hidro-Consulting Kft. provides climate protection expert consulting and applies unique technologies: degassing equipment for medicinal and thermal waters that require specialized expertise. With our innovative approach, we offer solutions to the most complex water management challenges.

Our Areas of Expertise

- Climate protection expert consulting
- Degassing equipment for medicinal waters
- Thermal water treatment technologies
- Innovative water management solutions

WHY US?

Why choose Hidro-Consulting Kft.?

Short lead times

Fast administration and flexible service for projects of any size.

Nationwide coverage

Full coverage across Hungary – you can count on us anywhere.

Decades of experience

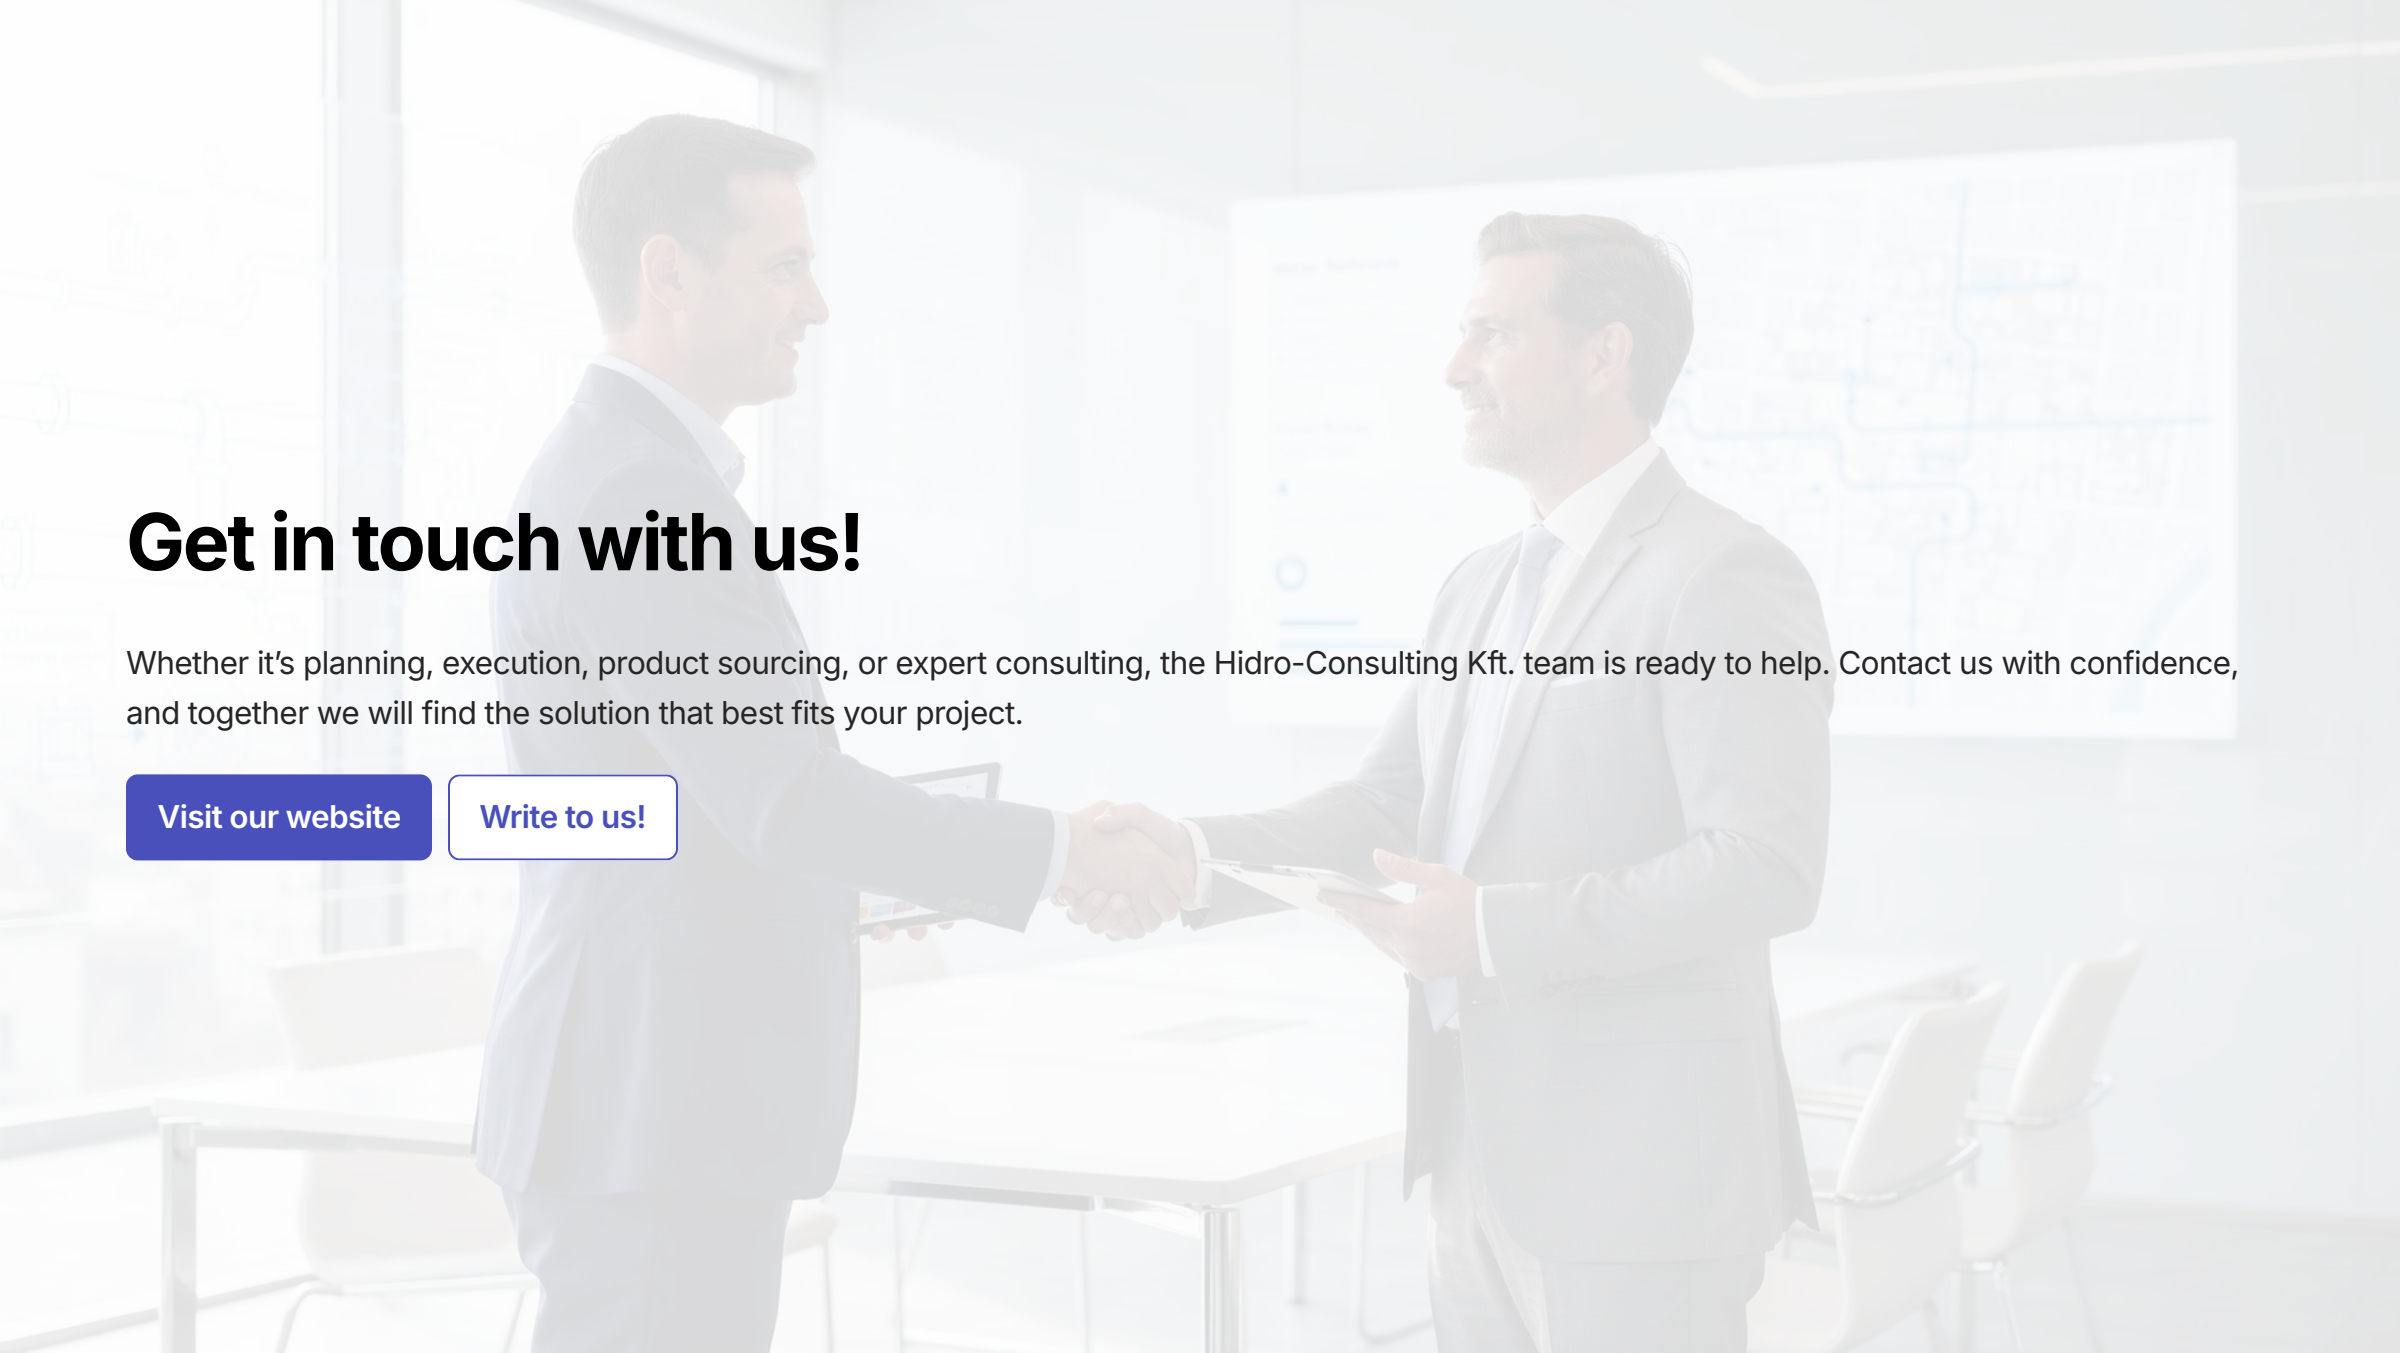

Decades of engineering expertise in the water management and civil engineering sectors.

Comprehensive approach

Design + trading + execution – from a single reliable partner.

Our clients: **municipalities, small and medium-sized enterprises, and residential customers** from all parts of the country.

Get in touch with us!

Whether it's planning, execution, product sourcing, or expert consulting, the Hidro-Consulting Kft. team is ready to help. Contact us with confidence, and together we will find the solution that best fits your project.
