

About us

all that is essential in trauma surgery

medimetal[®]

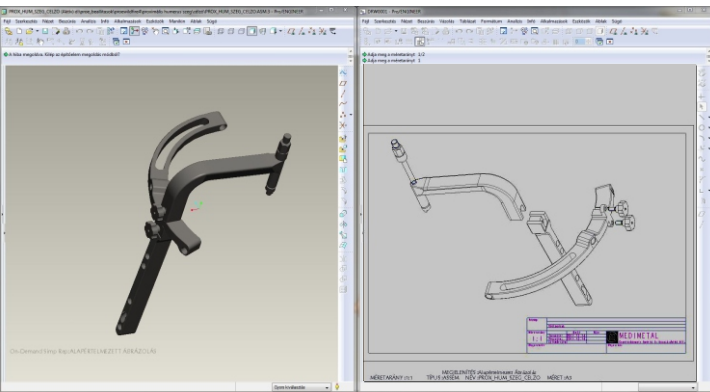

About us

The founders of Medimetal Ltd. - Mr Istvan Antal and Mr Istvan Stefan were the pioneers of trauma implant and instrument development and manufacturing in Hungary.

They dedicated their life to improving Traumatology in Hungary and since the 1970s have continuously invested energy and money in expanding the product range through development and innovation.

Medimetal Ltd. has been in operation in its current form since 1993.

We use the latest CAD-CAM system which enables rapid development of new ideas and efficient co-operation with our clinical partners.

Our manufacturing facility uses the latest technology from TORNOS and STAR, DMG work centers and Monnier-Zahner thread milling machines. We are aligned with EN ISO 13485:2012, ISO 9001:2008 and the EC Directive 93/42/EEC Medical Devices. The audits are performed by TÜV Rheinland.

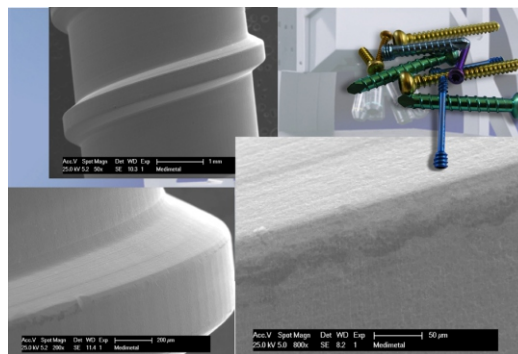

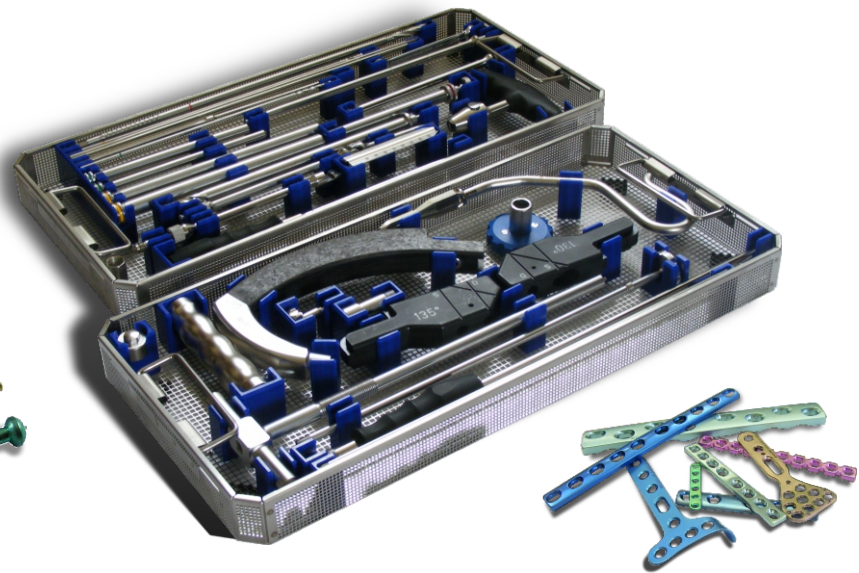

The products are made from the highest quality steel and titanium alloys of the leading suppliers (e.g. ZAPP and Sandvik) who guarantee quality and certification.
The implants testing is carried out in accredited laboratories.

All the finished products go through quality control.

We have 40 years of experience in developing and manufacturing implants and our wide range of products meets the high requirements of both the local market and also our export partners all over the world.

Thanks to the values of commitment to high quality, new technology and innovation in medical care and supply, Medimet Ltd. has been successfully developing for long decades.
