

KARSUS

Tailor made safety. Engineered by 

Railway

ABOUT US - KARSUS (Kárászy Suspension)

Over a century-long engineering experience
for shock absorbers

Our roots back to 1872, and since then, Kárászy is the lead shock absorber producer in Central and East Europe. We design and produce every Kárászy shock absorbers at our facilities located in Budapest, Hungary. Kárászy's products and engineering services meet global customer's requirements with complete satisfaction from Europe to Asia to Africa to America with the best quality.

WHY KARSUS?

Great experience in shock absorber manufacturing and the railway industry

We have successfully achieved recycling, development and manufacturing shock absorbers for our customers over four continents. Rigorous R&D studies are being conducted at the Kárászy in an innovative method in harmony with the developing technologies and customer-centered standards. Recycling and environmental awareness is a fundamental criterion in the designing of Kárászy shock absorbers. KARSUS shock absorbers comply with the highest standards desired in railway applications. We continuously strive to ensure whoever travels by a vehicle equipped with Kárászy shock absorbers can get home comfortably and safely anywhere and anytime.

OUR SERVICE

Decide it, dream it, and KARSUS will engineer it!

We can support you for the small-batch orders, even if you need a single piece of shock absorber with competitive prices. Our offer includes a wide range of railway shock absorbers covering any need that might arise in the railway sector. We provide comprehensive R&D services, from engineering and development to shock absorber manufacturing and its integration into the vehicle. We can help you reduce the production cost by recycling old and malfunctioned shock absorbers.
